

Future Directions in Cancer Prevention and Control at CDC

Mary C. White, ScD
Chief, Epidemiology and Applied Research Branch

CPCR5 Kickoff Meeting
January 27-28, 2020

CDC's Mission

The nation's health protection agency, CDC works 24/7 to save lives and protects people from health threats.

- Conducts critical science
- Provides health information
- Responds to health threats

How CDC Prevents Chronic Diseases and Promote Health

❑ Domain 1: Epidemiology and Surveillance

- Surveillance and epidemiology guide us in putting our resources to the best use

❑ Domain 2: Environmental Approaches

- Improving environments to make it easier for people to make healthy choices

❑ Domain 3: Health Care System Interventions

- Strengthening health care systems to deliver prevention services that keep people well and diagnose diseases early

❑ Domain 4: Community Programs Linked to Clinical Services

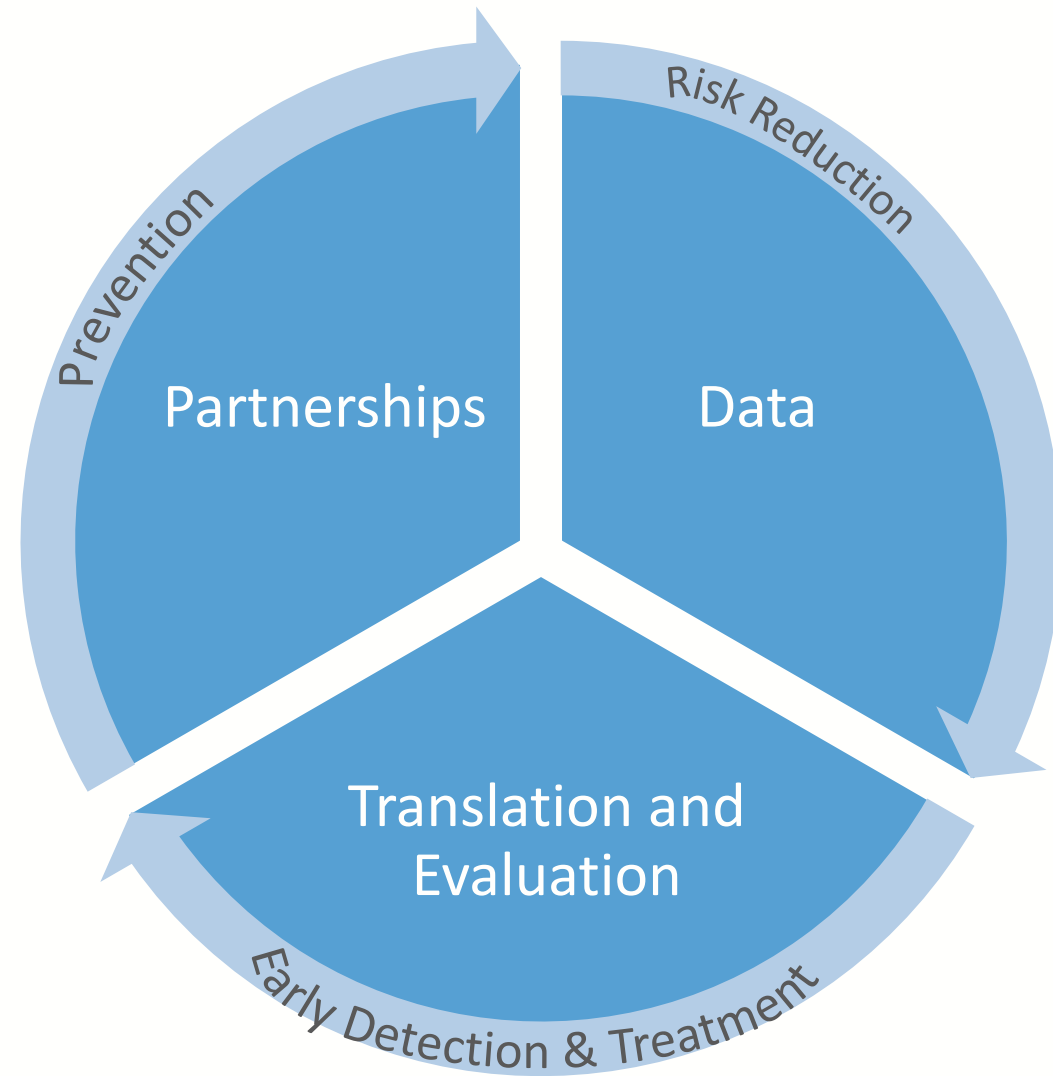

- Connecting clinical services to community programs that help people prevent and manage their chronic diseases and conditions

Leading causes of death in the U.S., 2016

Age years (Sex)	#1	#2
All ages (male)	Heart disease	Cancer
All ages (female)	Heart disease	Cancer
<20 (male)	Accidents	Assault
<20 (female)	Accidents	Cancer
20-39 (male)	Accidents	Suicide
20-39 (female)	Accidents	Cancer
40-59 (male)	Heart disease	Cancer
40-59 (female)	Cancer	Heart disease
60-79 (male)	Cancer	Heart disease
60-79 (female)	Cancer	Heart disease
≥80 (male)	Heart disease	Cancer
≥80 (female)	Heart disease	Cancer

Cancer is the leading cause of premature death (before age 80)

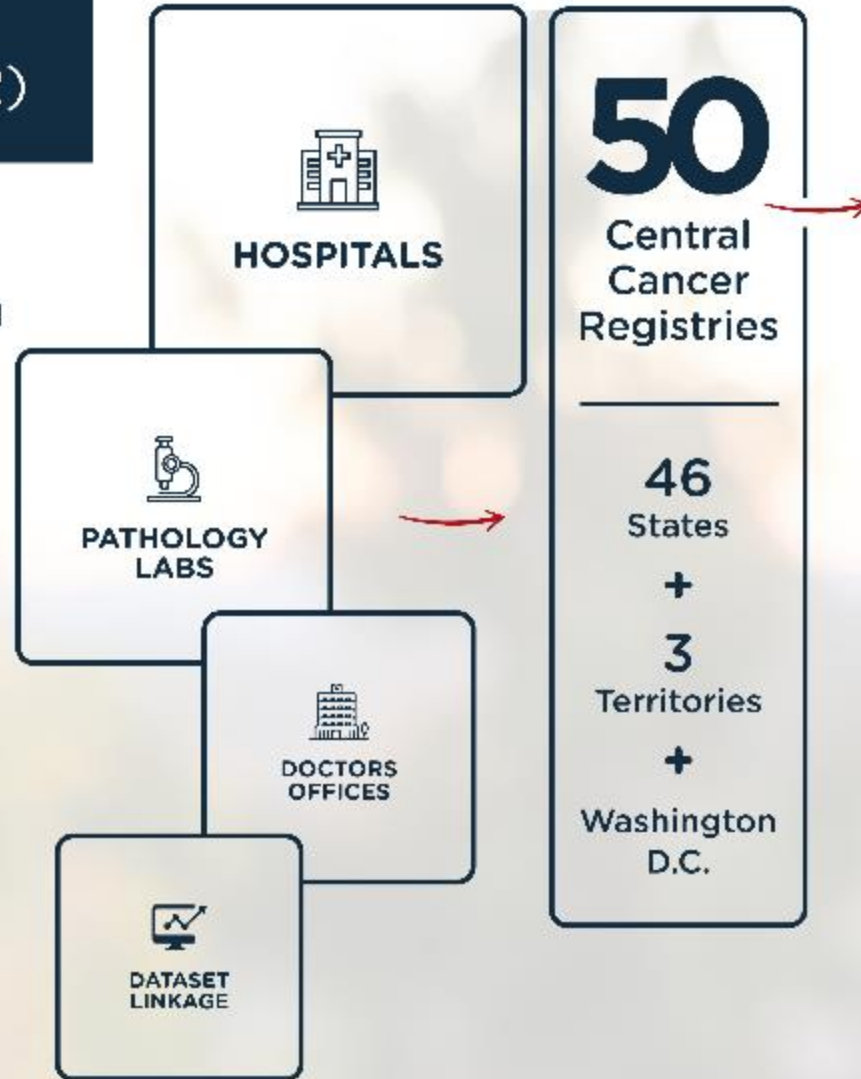

Catalyzing Cancer Prevention and Control

Positioned to
Drive Outcomes

National Program of Cancer Registries (NPCR)

- Coordinates collection, verification and reporting of important information on all reportable cancer cases.
- Helps identify better ways to prevent, treat and control cancer.

- Data Visualization Tool
- State Cancer Plans
- Public Use Dataset
- Reports & Research

Over 1.7 million new cases & nearly 600,000 deaths annually.

U.S. Department of
Health and Human Services
Centers for Disease
Control and Prevention

Measuring Progress. Targeting Action.

National Breast & Cervical Early Detection Program

Nearly 30 Years of outreach, education, screening, diagnostic testing

- Serves low-income, uninsured and underinsured women
- Screening and Diagnostic Services
- Special emphasis on women geographically or culturally isolated, or of racial or ethnic minorities

Colorectal Cancer Screening

Increasing population-level Colorectal Cancer Screening Rates

Colorectal Cancer Control Program

- System-level integration into primary care systems
- Evidence-based strategies
- Continuous evaluation and improvement

Colorectal Cancer Control Program

Funded by the Centers for Disease Control and Prevention

Comprehensive Cancer Control

Collaborating to Conquer Cancer

NATIONAL
Comprehensive Cancer Control
PROGRAM

Collaborating to Conquer Cancer

Priorities

- Emphasize Primary Prevention of Cancer
- Support Early Detection and Treatment Activities
- Address the Public Health Needs of Cancer Survivors
- Implement PSE Changes to Guide Sustainable Cancer Control
- Promote Health Equity as it relates to cancer control
- Demonstrate Outcome through Evaluation

Looking to the Future

Jan. 8, 2020

The New York Times

Cancer Death Rate in U.S. Sees Sharpest One-Year Drop

Breakthrough treatments for lung cancer and melanoma have driven down cancer mortality overall — and from 2016 to 2017 spurred the largest-ever decline.

Every cancer statistic can be followed by a “Yes, and...”

Overall cancer death rates have declined

- **But not for all cancer types, subpopulations, or geographic areas**
- **Absolute number of cancer deaths have increased, due to changing demographics (age)**
- **Incidence and/or death rates have increased for several types of cancer**
- **Number of new cases projected to increase, even if incidence rates remain stable, due to increase in number of older adults**
- **Cancer disparities persist**

Cancer Health Disparities Defined

- **NCI defines as:**

“adverse differences in cancer incidence, prevalence, death, survivorship or burden of cancer or related health conditions that exist among **specific population groups** in the United States.”

- **Population groups:**

- age
- disability
- education
- ethnicity
- gender
- geographic location
- income
- race

All People Free of Cancer

Aspirations

<p>PREVENTION</p> <p>Eliminate preventable cancers </p>	<p>SCREENING</p> <p>All people get the right screening at the right time for the best outcome </p>	<p>CANCER SURVIVORS</p> <p>Cancer Survivors live longer, healthier lives </p>
--	--	---

Strategic Priorities

<p>Reduce risk of cancer</p>	<p>Scale best practices to increase screening outcomes</p>	<p>Improve health and wellbeing for cancer survivors</p>
------------------------------	--	--

Guiding Principles

<p><i>Equity</i></p>	<p><i>Begin with the End in Mind</i></p>	<p><i>Collaboration</i></p>	<p><i>Targeted Communications</i></p>
----------------------	--	-----------------------------	---------------------------------------

Strengths

<p><i>Data</i></p>	<p><i>Translation & Evaluation</i></p>	<p><i>Partnership</i></p>
--------------------	--	---------------------------

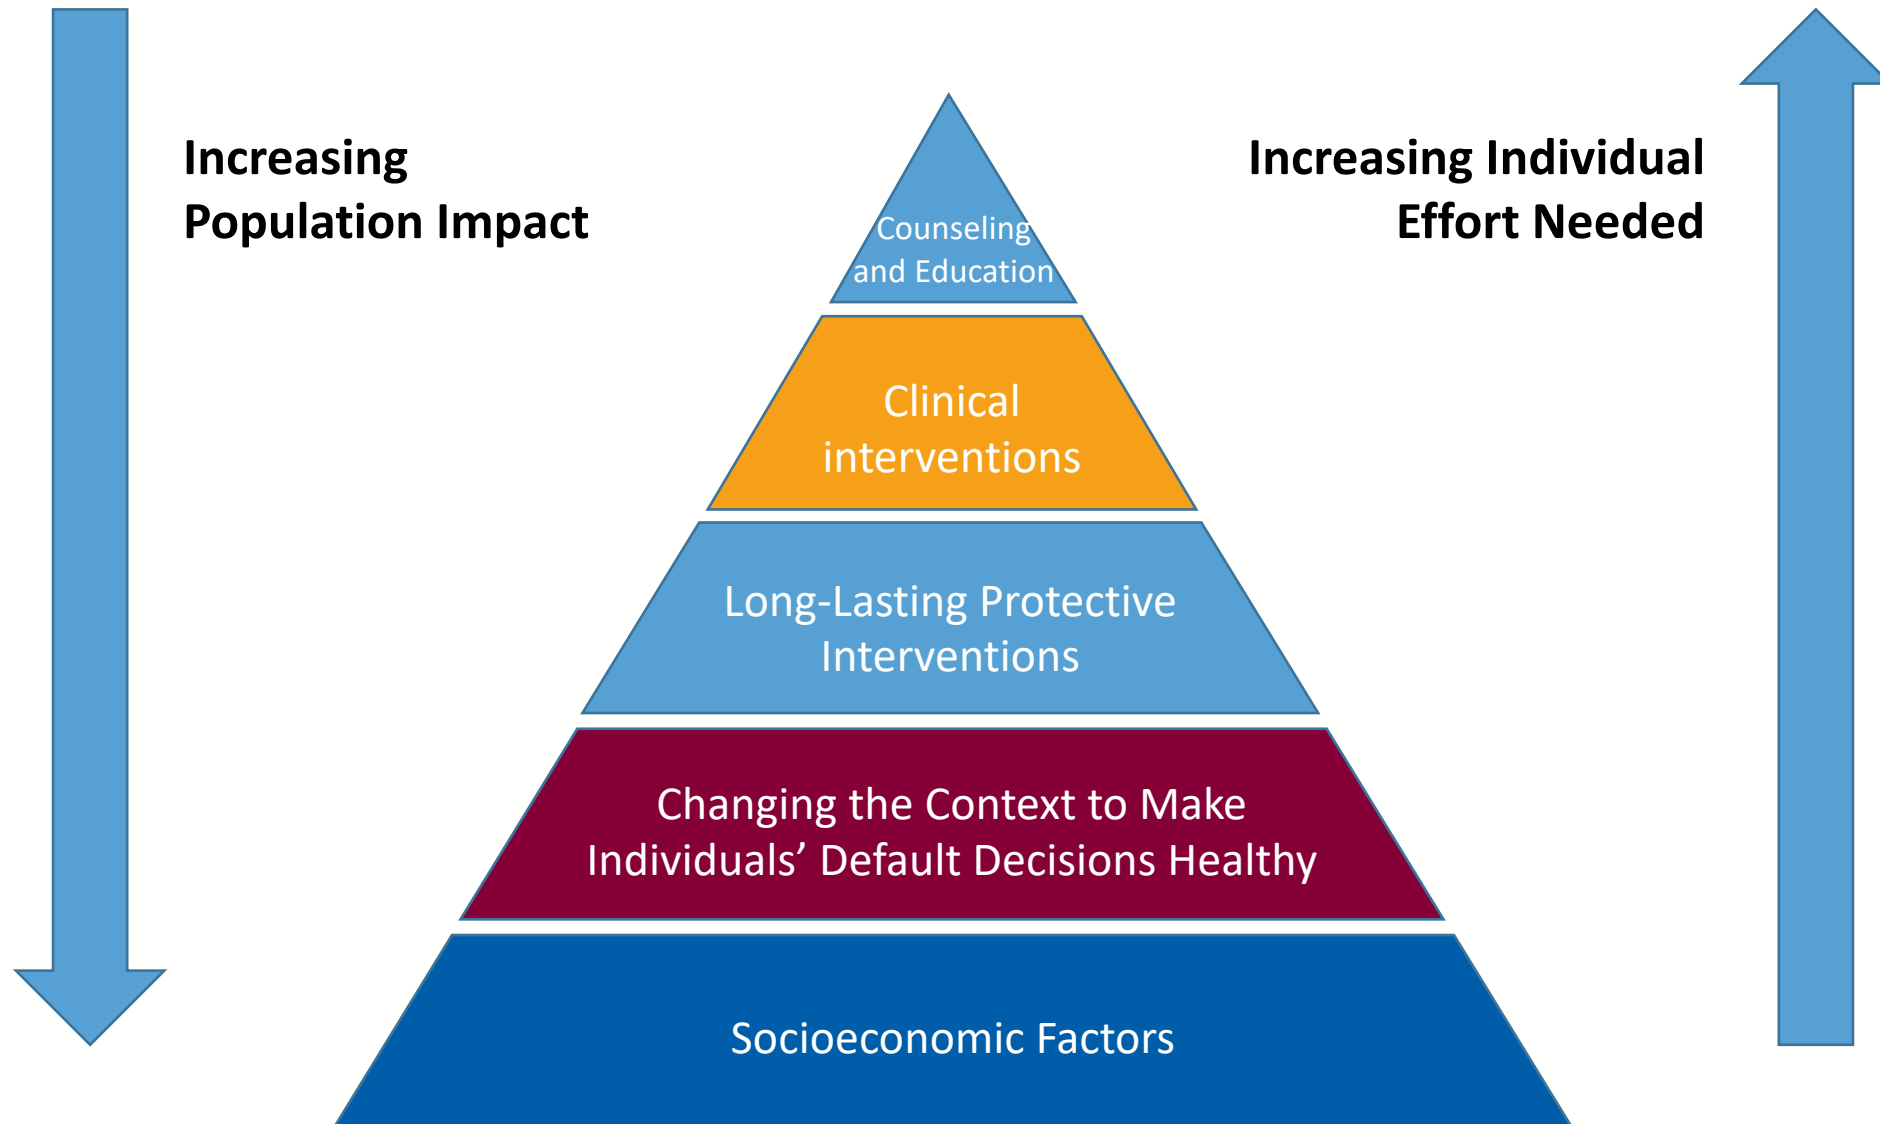

Advancing Health Equity

Public Health 3.0: Focus on the Social Determinants of Health

The Health Impact Pyramid

Tackling social inequities

What is “modifiable”?

- Non-modifiable
 - Age
 - Race/ethnicity
 - Genetics
 - Poverty
- Potentially modifiable
 - Factors that accelerate aging
 - Policies that prohibit discrimination
 - Gene expression (epi-genetics)
 - Educational and economic opportunities

Advancing Science

Data to Action

Science Impact Framework:

- Disseminating Science
- Creating Awareness
- Catalyzing Action
- Effecting Change
- Shaping the Future

**“One of the things that bothers me the most is when we leave science on the shelf.”
Robert Redfield, MD, Director, CDC**

Thank you!
