

Equitable Implementation of Lung Cancer Screening Interest Group (Developing)

Jamie L. Studts, PhD

Alison T. Brenner, PhD, MPH

This presentation is supported by the Centers for Disease Control and Prevention of the U.S. Department of Health and Human Services (HHS) as part of a financial assistance award with 100 percent funded by CDC/HHS (Cooperative Agreement Number U48 DP006400). The contents are those of the author(s) and do not necessarily represent the official views of, nor an endorsement, by CDC/HHS, or the U.S. Government.

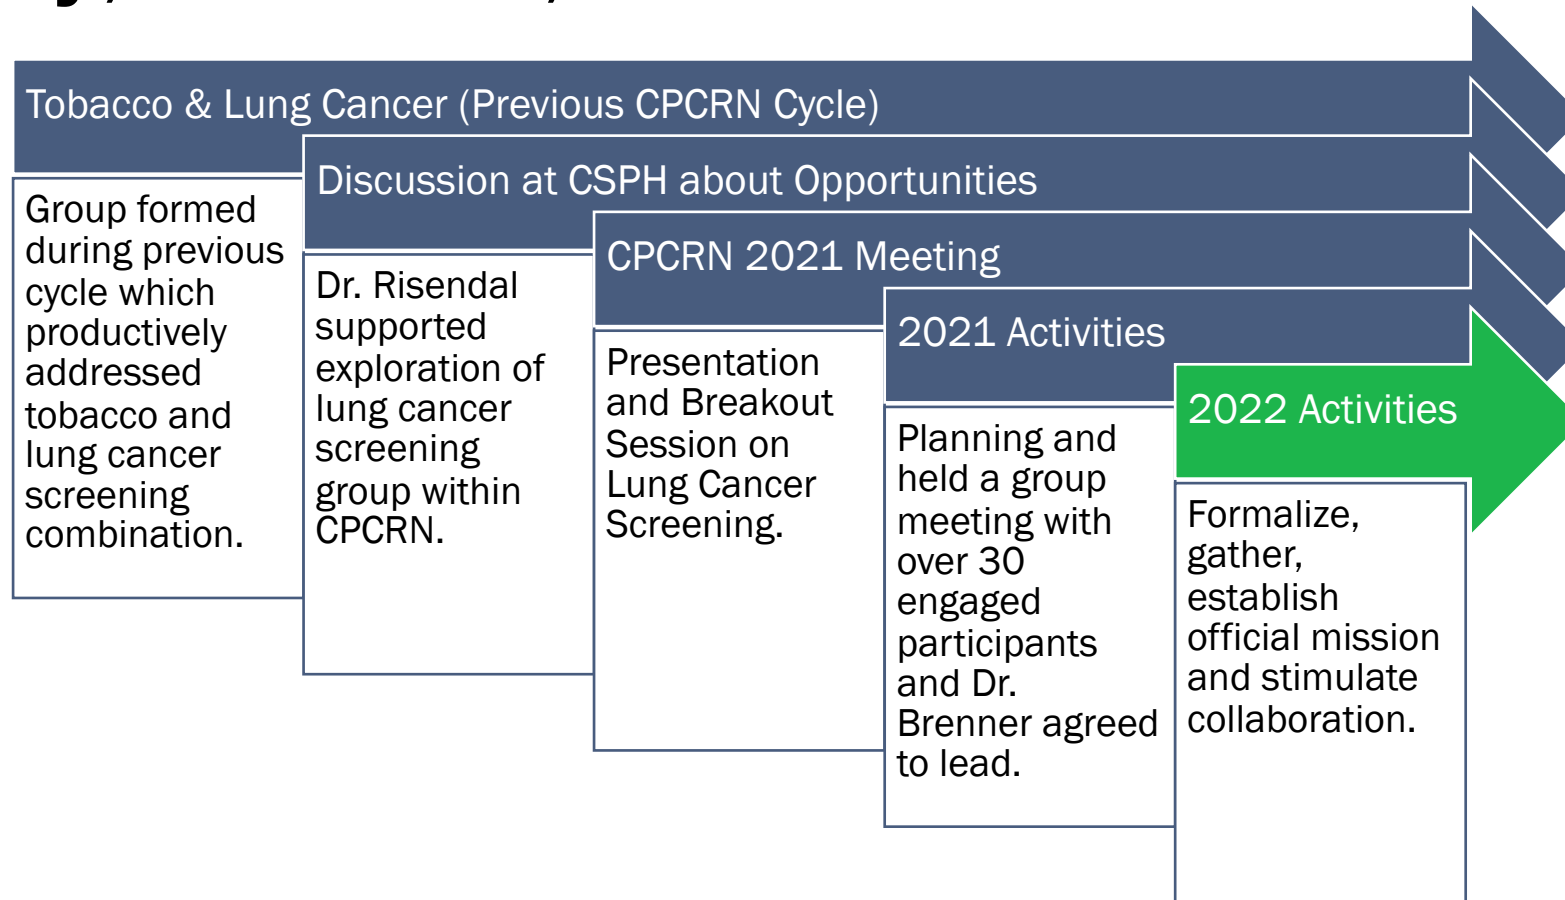

The Opportunity

	↑	↑	↑	↑
Percent localized stage:	17%	20%		28%
All stages, 3-yr survival:	21%		31% ^b	

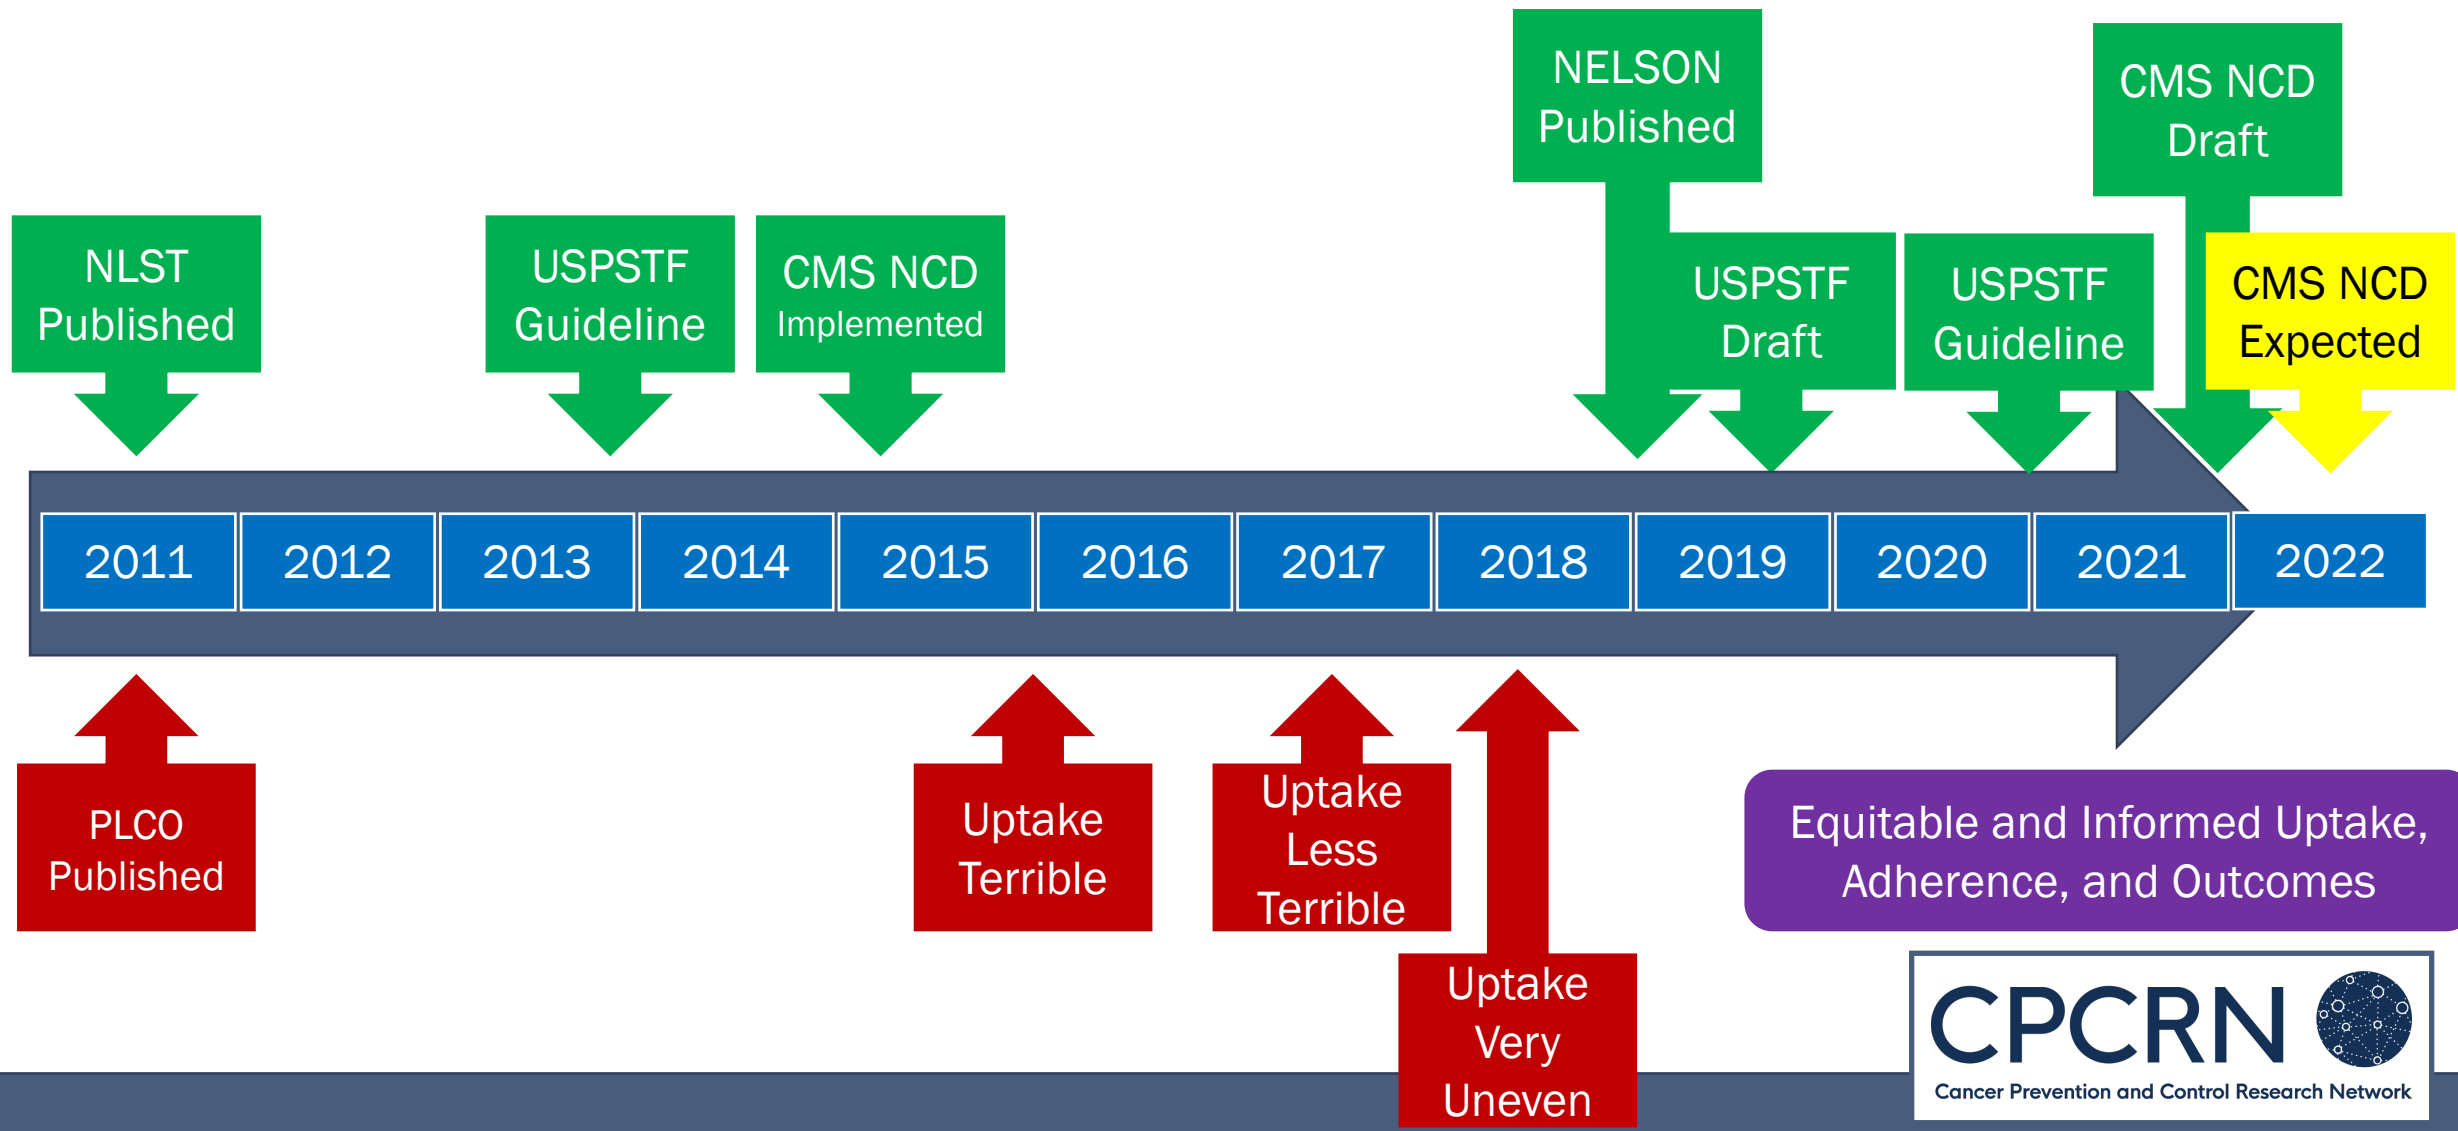

“Lung cancer screening is currently the greatest missed opportunity to reduce cancer mortality throughout the US—not just lung cancer mortality, but overall cancer mortality.”

History, Mission, and Formation

Lung Cancer Screening: The Implementation Story

Foundation

- 1) Assume stark and distressing disparities are emerging even without documentation (all of lung cancer screening is technically a disparity)
- 2) Consider targeted outreach and engagement opportunities to collaborate with specific at-risk communities
- 3) Explore clinician-focused efforts to raise awareness, build skills, and enhance equitable implementation
- 4) Contemplate health system interventions to facilitate equitable implementation
- 5) Mitigate likely exacerbation of known disparities in lung cancer outcomes
- 6) Diverse communities, diverse methods, diverse levels of intervention

Consider Adoption of Socioecological Model of Lung Cancer Screening

Community Outreach Opportunities

African American

Veteran's

Rural

Serious Mental Illness

LGBTQI

Urban

American Indian

Hispanic

Opportunities for Member Engagement
